Dr. Richman attended the Philadelphia College of Pharmacy and Science and the Pennsylvania College of Optometry (PCO) where he graduated in 1968 with a doctorate of optometry degree. He has practiced in Pennsylvania (PCO) and Michigan (Ferris State University) where he held academic positions as well as serving as the Chief of the Pediatric Optometry Service. In 1984 he was invited to join the faculty at the New England College of Optometry. He lectured on Strabismus and Amblyopia, Oculomotor and Binocular Disorders, Pediatric Optometry, and General Pharmacology of the Central Nervous System and Drugs of Abuse.

He has lectured widely, both in this country and internationally and has published many research and clinical articles and papers on the diagnosis and management of vision disorders in professional journals and textbooks. His primary clinical research interests are in children’s vision, vision dysfunction and reading, the effect of nervous system impairment on eye movements, and visual attention dysfunction. He has published close to sixty articles and book chapters on these subjects.

Dr. Richman is a Fellow of the American Academy of Optometry, a Diplomate in the section on Pediatric Optometry, Binocular Vision and Perception, a Fellow of the College of Optometrists in Vision Development, and a member of the Neuro-Optometric Rehabilitation Association.

He is presently a Professor Emeritus at the New England College of Optometry. He is semi-retired and practices part time in a private group practice in Falmouth, Massachusetts, specializing in assessment and treatment of visual problems related to acquired brain injuries and learning related vision problems. He serves on the consulting staff at the Spaulding Rehabilitation Hospital Traumatic Brain Injury Unit, and the Spaulding Rehabilitation Hospital of the Cape and Islands.

Dr. Richman's interest in binocular vision disorders and eye movements has involved research, publications, and teaching in the use of eye movements used in Standardized Field Sobriety Testing (SFST), the Horizontal Gaze Nystagmus (HGN) test, and the use of pupil measurements for detecting drug and fatigue impairment. He is an active Standardized Field Sobriety instructor, a Drug Recognition Expert, and a Drug Recognition Expert instructor. He served as the medical consultant to the National Highway Safety Committee’s Technical Advisory Panel of the International Association of Chiefs of Police for fourteen years and continues as a special counsel. He has served as an expert witness in many cases regarding field sobriety testing, HGN, and DRE assessment throughout the United States. He serves as the police physician for the Hingham Police department in Massachusetts.
There will be a symposium on Thursday, March 26 at 6:00 pm. Dr. Richard Laudon will be the facilitator of a panel which will include various professionals along with the Behavioral Scholar-In-Residence. This symposium is open to all students, faculty and invited guests.

Dr. Richman’s visit will also include presentations to the first, second and third-year classes at NECO, as well as a continuing education lecture. Details on the lecture are listed below.

**Date:** Sunday, March 29

**Time:** 9:00 AM-noon

**Title:** “Aging and Driving – Role of Vision and Visual Information Processing in Elderly Drivers.”

**Registration Required:** Yes*

**CE Credit:** COPE

**Description:** Elderly drivers require complex coordination of many different skills, both physical and mental. The influence of these changes in vision and visual information processing abilities during driving and reading will be discussed. Included will be clinical information for evaluations, its relationship with safe driving, and approaches to vision therapy and rehabilitation.

---

Join us for these exciting programs and meet the 2015 Behavioral Scholar-in-Residence, Dr. Jack Richman!

*Registration Fee: $80.00  *(Fee waived for NECO faculty, students and OTs.)*
